Skills

va

- Javascript | React Js | Html | CSS (cascading style sheet) | Node Js | Express.js | Basics of Typescript | Redux Tool-kit | Axios

- Git | UI design | Figma(Basic) | Material UI | Flutter | Nosql | Arango Db(Nosql) | Backend | Frontend | App Development

Experience

Software Engineer	**AINQA Health**	**09/03/2022 - 25/09/2023**

- Design and developed multiple enterprise-level applications of Ainqa Health, using the latest technologies **React Js, Javascript, Node Js, Express.js, Flutter, Dart, Arango Db (Nosql), and Redux Tool-kit**.

- Followed and Implemented various Design patterns in React.js to build and provide a well-enhanced UI and UX.

- Designed and implemented scalable RESTful APIs to provide robust services to applications by using **Node Js, Express Js,** and Postman.

- Developed reusable functional components and **npm** packages to successfully reduce 65% of unnecessary repeated tasks across various Ainqa Health projects and applications.

- Implemented a **JWT**-based login authentication system using Node js and React.js, ensuring secure and seamless user authentication and authorization with proper token management and verification mechanisms.

- Managed complex data and state flow using **Redux Tool-kit** state management and react js **Context API**.

- Aided and assisted in testing and production support.

Currently learning

- Currently, I'm focusing on honing my skills in Figma(UI design), Next Js, and Typescript.

- Currently working on this Project - https://github.com/Rajgokul80565/doctorIn. and my portfolio website

- Started learning Docker

Education

BSc Computer Science	**Hindustan collage of arts and science**	*Coimbatore,TN*	**08/2017 - 06/2020**

Others

- Language - English and Tamil. • Currently pursuing Japanese N5 level.
